Company Profile:

Shooters Choice in Dover Delaware. Shooters Choice sells fire arms and has a firing range on site.

The Situation:

The facility was changing air filters based off the air flow feeding the shooting range. They were changing pleated filters weekly and bag filters every month.

The Action:

After bringing in a sample of the Camfil HiFlo ES bag filter and explaining the added benefits of the HiFlo ES SR the owner of Shooters Choice decided to give them a chance and purchased a set

The Result:

After 2 month of use the HiFlo ESSR is holding up considerably better than the pre and bag filter combination that was used in the past. After a brief inspection the owner and maintenance staff were shocked at how much particulate the bags were holding and that there was no lead on the air exiting side of the bag filters.
