

Softwall Cleanrooms

SOFT WALLS

Our *Flexible Solutions* Softwall Cleanrooms Control a Variety of Workspace Environments

We offer both standard designs and custom-engineered softwall cleanrooms for demanding and unique applications.

Self-contained *Flexible Solutions* Softwall Cleanrooms are offered in ISO Class 5 through 9, or US Federal Standard 209 Class 100 through 100,000. Standard rooms are equipped with *SAM* Fan Filter Units for HEPA filtration, lighting, a 4' strip door, and solid curtain wall panels.

We offer several options including casters, telescoping legs, a variety of curtain choices, and our exclusive state-of-the-art *SAMlink Control System*. With our optional casters, you can easily roll the *Flexible Solutions* Softwall Cleanroom from one location to another for maximum flexibility.

For more information about options, customized rooms or special applications, call one of our cleanroom experts located in your area, or consult with our Sales Department.
